

Quality Assessed Providers

At SMART we believe in using only training providers that we know and trust. SMART has a standard process of vetting all providers. This system has been in use for over 20 years, and has had remarkable success. SMART has a clear set of quality standards criteria, against which all applicants for our Register of Approved Training Providers (RATP) are assessed. Our staff first developed this system over 10 years ago, and we are confident that any provider identified on our RATP meets international quality standards for their training specialisation.

Â

Our assessment process ensures that SMART's register of quality assessed providers reviews not only the course provider, but also the teaching staff, facilities and amenities in the town or city where the course will be located. This is done against strict control criteria. We are continually updating this register, and researching new provision of training and the latest technologies throughout the world. SMART will be pleased to accept any client requests to assess course providers, anywhere in the world. Course providers who wish to be placed on our register should e-mail for a Registration Pack, and we will be delighted to consider new applications.
